

# ***Protect Our Dolphins***

**With Dr. Toni Frohoff,** Director and co-founder of TerraMar Research. She is a behavioral and wildlife biologist who has been studying marine mammal behavior and communication for over 20 years.

Dr. Frohoff specializes in behavior, stress and welfare in captive and free-ranging dolphins in response to human activity. Most recently, she has initiated the first intensive study of the behavioral ecology of dolphins in the Santa Barbara region of California. This study is an important component of the newly formed Protect Our Dolphins (POD) an educational, scientific, and community based organization.

A public talk followed by Q+A presented by the **Humanist Society of Santa Barbara.**

**2:30pm doors open** for refreshments, 3pm meeting starts on **Saturday, April 16th, 2011.**

**In the Patio Room at Vista del Monte, 3775 Modoc Road, Santa Barbara.**

Bring a copy or mobile image of this poster for free admission. Optional donations appreciated: \$2 students or \$5 general.
